

Prof. Jayanand  
Registrar,  
Noida International University

It is a matter of delight to learn that Mahaveer Institute of Technology, Allahabad has collaborated with Noida International University, Greater Noida for the mutual exchange of academic and technical resources.

Noida International University (NIU) is a UGC recognized World Class University sprawling in an area of 75 acres. With an array of accredited courses, qualified faculties and state of art infrastructure, the 11 schools of NIU offering more than 150 programs in various streams, cater to the educational needs of students from 28 nations.

NIU believes that the development of a nation can only be ensured by providing quality education to every student. The role of technical and hands-on education is to empower the youth with suitable proficiency that not only help them in making a living but also in enriching the skill pool of India. In this direction, Mahaveer Institute of Technology, Allahabad is an upcoming academia established in the year 2011 with the aim of producing skilled engineers with expertise in various technical fields and working towards the acceleration of technological development of the country.

NIU is pleased to provide a helping hand to Mahaveer Institute of Technology, Allahabad through this academic collaboration. Under this association, the students would be extremely benefitted to experience an outstanding international academic ambience. The alliance will also be used to share high end instruments and modern scientific laboratory facilities. Students will also get a chance to interact with high profile teachers and avail the extensive library facilities. All these will mutually work towards honing the technical skills of the students of both the institutes that will not only enhance their employability but also inculcate the technical and research aptitude.

I sincerely hope that the present collaboration will strengthen the technical and research pursuits of the both the organisations, by enthusing the participants to actively exchange their ideas at technical and scientific frontiers. I convey my best wishes to Mahaveer Institute of Technology, Allahabad in all their future endeavours.
